MANUAL TESTING TASK - Ana Rita Clemente Mendes

Scenario 1: Test Drive Booking

ID: TDB-1

Reporter: Ana Mendes

Title: In the vehicle and motorization screen (step 3), the wrong type of vehicle is displayed

Description: After selecting EQE saloon in the first screen, when the user is confirming the information about the car in step 3, the incorrect information is displayed. In this case, EQE saloon was selected, however, in the confirmation screen EQS saloon is displayed. Noticed that in the Request vehicle section in the bottom of the screen, EQE Saloon name is displayed and that is correct. But the title displayed at the top of the screen, is referring to EQS saloon.

Steps do Reproduce:

1. Select a vehicle model, in this case EQE Saloon
2. Select a dealer in the map
3. Confirm the selected dealer
4. Validate information about the car

Severity: Major

Product Version: 6.0

Environment Information:

- Operating System: IOS 16
- Browser: Safari v16.5
- Environment: Production

Title: Search box is displaying *Search by location* label instead of *Search by address*

Description: When choosing Search by address label at the top of the screen, the text box above shows Search by location. That is not coherent with what was chosen on the label.

Steps do Reproduce:

1. Select a vehicle model.
2. In the Test drive at a Showroom page, select Search by address.
3. Validate text box information.

Severity: Minor

Product Version: 6.0

Environment Information:

- Operating System: IOS 16
- Browser: Safari v16.5
- Environment: Production

Title: Number of Showrooms displayed on the map do not add up with the number of Showrooms displayed on the information text above the map

Description: When counting the numbers that are displayed on the map, the total is 118. However, in the message above the map it says that a total of 221 showrooms have been found. If the number on the information message is correct, that means that the map is not showing the correct information and there are some showrooms missing from the image. This could lead to misinformation to the user. This type of search normally queries the information in relation to the image that is displayed on the map, so that is what the user is expecting.

Steps do Reproduce:

1. Select a vehicle model.
2. In the Test drive at a Showroom page, select Search by address.
3. Validate the information above the map and compare it with the number that is displayed on the map.

Severity: Minor

Product Version: 6.0

Environment Information:

- Operating System: IOS 16

Title: Map is showing showrooms in France but do not show any in Ireland

Description: The target market is the UK. However, the map acts like a filter. If Ireland is displayed on the map, it must be taking in consideration by the query. France showrooms are displayed but no Ireland's showroom is displayed. This should be coherent.

Steps do Reproduce:

1. Select a vehicle model.
2. In the Test drive at a Showroom page, select Search by address.
3. Validate where the circles/marks are displayed on the map.

Severity: Minor

Product Version: 6.0

Environment Information:

- Operating System: IOS 16
- Browser: Safari v16.5
- Environment: Production

Scenario 2: Search a Vehicle

ID: SV-1

Reporter: Ana Mendes

Title: After selecting EQB in the Vehicle Type window, the information on the show button is not correct

Description: When selecting the EQB model, the show button displays 0 results. But when clicked, the results show 72 available vehicles. The show button on the filter window should display the information accordingly. This could lead to the user thinking that there is no vehicle available and not clicking in the show button to actually seeing the result.

Steps do Reproduce:

1. Navigate to the search page.
2. Select Vehicle Type and choose EQB model.
3. Validate information on the Show button on the bottom right of the window.
4. Click on the Show button.
5. Validate the number of vehicles that are displayed.

Severity: Major

Product Version: 8.246

Environment Information:

- Operating System: IOS (iPad Pro 12)

Title: Sorting filter is not working correctly when exists a price reduction

Description: When there is a price reduction in the value of the cars, the sorting of the results is not correct. When choosing EQB as model in the filters area, the results that are displayed have price reductions. The sorting is ordering the cars by the value without reduction and not by the reduced value (sorting is selected as Price: Low to High).

Steps do Reproduce:

1. Navigate to the search page.
2. Select Vehicle Type and choose EQB model.
3. Click on the Show button.
4. Validate the values of the cars displayed and if the sorting of them are correct according to the actual value and not the value without the reduction.

Severity: Major

Product Version: 8.246

Title: GLA 200 Model do not have any photo in the result list

Description: GLA 200 Model is displayed on the list of vehicles, it says that is available in stock, however, no preview photo is available.

Steps do Reproduce:

1. Navigate to the search page of available vehicles.

Severity: Low

Product Version: 8.246

Environment Information:

- Operating System: IOS (iPad Pro 12)
- Browser: Chrome v114.0.5735.198
- Environment: Production

Title: Vehicle type filter is showing car models

Description: After choosing vehicle type filter, the list of models is displayed. As a user it is confusing because the name of the filter does not correlate to the information that is displayed. And also, after

selecting a model in the filter, the information that is provided to the user is that he selected a model of a car and not a vehicle type.

Steps do Reproduce:

1. Navigate to the search page.
2. Select Vehicle Type
3. Validate the options available on the list.

Severity: Major
